## PROFILE

---

MERN Stack Developer with hands-on production experience shipping real-time booking and marketplace platforms used by live customers. Comfortable across the full stack — from normalized PostgreSQL/MySQL schema design to Next.js App Router UI — with practical exposure to payment gateway integration, Socket.IO real-time events, and role-based access control. Graduated July 2025; immediately available.

## PROFESSIONAL EXPERIENCE

---

**MERN Stack Developer** | **AlfaOrigin** · Rawalpindi, Pakistan

Jan 2025 – June 2025

**Care N Trust** — Website verification and trust Analysis

[checkntrust.com](https://checkntrust.com)

**Stack:** Next.js, Node.js, Express.js, MongoDB

- Built responsive, mobile-first React.js interfaces using Tailwind CSS, converting pixel-perfect Figma designs reusable, scalable component architectures with React Hooks.
- Integrated RESTful APIs via Axios/Fetch for dynamic data handling and developed interactive UI features including dynamic layouts and multi-step forms with cross-browser compatibility.
- Collaborated with design and backend teams in an agile environment to deliver production-ready, maintainable frontend features on schedule.

**MERN Stack Developer** | **MarifahSol** · Islamabad, Pakistan

Aug 2025 – Present

**Care N Clean** — Home and Commercial Services Booking Platform

[carencleanss.com](https://carencleanss.com)

**Stack:** Next.js, TypeScript, Node.js, Express.js, MySQL, Socket.IO, Tailwind CSS, Payment Gateway

- Built a responsive service-booking UI in Next.js + Tailwind CSS covering browsing, scheduling, and checkout — supporting wallet-based and cash-on-delivery payment flows via integrated payment gateway.
- Implemented real-time booking status updates and chat notifications with Socket.IO, cutting customer support queries by reducing uncertainty at booking confirmation.
- Designed a normalized MySQL schema (users, providers, bookings, payments, categories) and built RESTful APIs in Express.js with JWT authentication and middleware-based authorization.
- Delivered end-to-end — from DB design to production deployment — as the sole backend engineer on the team.

**Swiss411** — Watch Marketplace & Registry Platform

[swiss411.marifahlab.com](https://swiss411.marifahlab.com)

**Stack:** Next.js, TypeScript, PostgreSQL, Supabase, Socket.IO, Tailwind CSS, Payment Gateway

- Architected a multi-role platform (Buyer, Dealer, Admin) with Supabase Auth and PostgreSQL row-level security (RLS) policies — zero shared-data leakage between roles.
- Built real-time Buyer–Dealer chat via Socket.IO enabling price negotiation before offline purchase, replacing a manual WhatsApp-based workflow.
- Developed a full Admin dashboard for user management, listing approval/rejection, and transaction oversight; integrated Payment Gateway for certificate fee collection.
- Delivered fully server-side rendered pages using Next.js App Router with end-to-end TypeScript for type safety across components, API routes, and DB queries.

## NOTABLE PROJECTS

---

### HerbLens – AI-Powered Herb Identifier — Final Year Project (Mobile App)

**Stack:** *React Native, TensorFlow/Keras, EfficientNet, Node.js, Express.js, MongoDB, Cloudinary*

- Built a React Native app integrating an EfficientNet + TensorFlow/Keras CNN model to identify herbs from live camera images with real-time prediction responses.
- Designed a MERN backend to manage user data, herb encyclopedia, and location tracking; used Cloudinary for image hosting and MongoDB for prediction history.

### Airbnb Clone — Full-Stack Web Application

**Stack:** *React.js, Node.js, Express.js, MongoDB, Google Maps API, JWT, Cloudinary*

- Built a full-stack property listing and booking platform with JWT auth, Cloudinary image upload, Google Maps location filtering, and RESTful API design.

### MYTech — Full-Stack ECommerce based Web Application

**Stack:** *React.js, Node.js, Express.js, MongoDB, Restful API, JWT*

Created a MERN-stack e-commerce solution that enables secure user authentication, product browsing, cart management, and seamless order processing through RESTful APIs.

## TECHNICAL SKILLS

---

|               |                                                                                        |
|---------------|----------------------------------------------------------------------------------------|
| Frontend      | React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap |
| Mobile        | React Native                                                                           |
| Backend       | Node.js, Express.js, RESTful APIs, JWT Auth, Middleware Architecture                   |
| Databases     | PostgreSQL, MySQL, MongoDB, Supabase, Firebase Realtime DB                             |
| Real-Time     | Socket.IO, Payment Gateway Integration, Google OAuth 2.0, Google Maps API              |
| ML / AI       | EfficientNet, TensorFlow, Keras (model integration in production apps)                 |
| Dev Tools     | Git, GitHub, VS Code, Postman, npm, Cloudinary, Multer, Nodemailer                     |
| Visualization | Chart.js, Recharts, Dashboard Design                                                   |

## EDUCATION

---

### Bachelor of Science in Software Engineering · Nov 2021 – Jul 2025

University of Mianwali · Punjab, Pakistan

**Relevant coursework:** Data Structures & Algorithms · OOP · Database Systems · Web Technologies · Software Engineering · Networking
